

## GM PRODUCTION OPTION CODES

Beginning in 1984, GM vehicles have a Service Parts Identification label which lists the Option Codes for that particular vehicle. Most trucks have it attached to the glove box door or the hood. On most passenger cars it is located in the trunk compartment or tail gate area, with the following exceptions:

Astro -	'85-95, on the glove box door; '96-00, on the right front door
Camaro -	'84-'90, on the console door; '91-92, on inside of right rear quarter trim panel door; '93-96, on the glove box door '97-00, on the left door
Chevrolet Van -	'84-95, on the glove box door; '96 Express, on the right front door; '97-00, on the right front door
Corvette -	'84-85, under the rear floor panel compartment door; '86-00, on the console door

## CHRYSLER PASSENGER CAR

1967 and up a metal tag is bolted to assembly, giving axle ratio or tooth count. Locking axles have a metal tag with the letter "S" on it.

Since tags may easily be missing, the approximate ratio can be determined by marking both a wheel and the driveshaft. If the axle is non-locking, secure opposite wheel and turn the marked wheel two complete turns; if the axle is locking, turn the marked wheel one complete turn; the number of times the driveshaft rotates is the ratio.

Locking axles can be identified by raising the complete axle assembly and turning one wheel; if the other wheel turns the same direction the axle is locking; if it turns the opposite direction the axle is non-locking. Caution: a bent axle can produce results inconsistent with those described.

## GENERAL MOTORS REAR AXLE IDENTIFICATION

### PASSENGER CAR

General Motors axles are built by several manufacturers. Code letters identifying each type of axle are stamped on the front of the right axle tube., approximately 3" to 5" from the carrier (see example).

#### EXAMPLE:

#### Locking Axle Identification Manufacturer Identity

E - Eaton	B - Buick
G - Chevrolet	C - Chevrolet, Buffalo
O - Oldsmobile	G - Chevrolet Gear & Axle
W - Borg Warner	K - GM of Canada, St. Catherine
	M - GM of Canada
	O - Oldsmobile
	P - Pontiac
	W - Chevrolet, Warren

### TRUCK REAR AXLE CODE LOCATION

#### Corporation:

10 & 1500 SERIES: Stamped on the front of the right axle tube, 3" to 5" outboard of the carrier.

20, 30, 2500 & 3500 SERIES: Stamped on the top of the right axle tube, 6" to 8" outboard of the carrier.

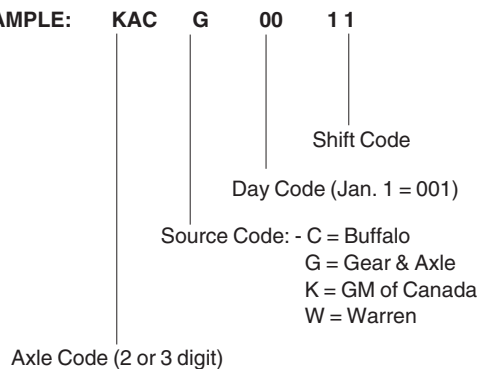

#### Spicer:

Stamped on the rear surface of the right hand axle tube. In addition, the axle code appears on a strip of tape attached to the outboard end of the axle tube.

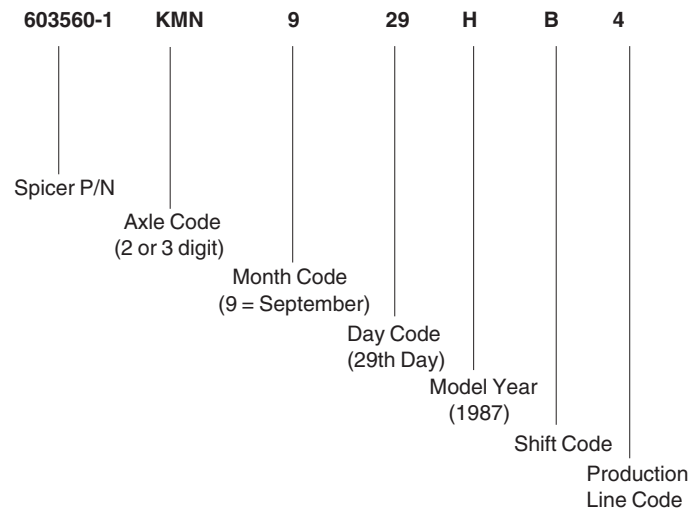

All Corporation - built rear axles are stamped with a prefix code designating the axle ratio and vehicle identification, axle source, build date and shift code.

All Spicer rear axles are stamped with the Spicer part number and production code indicating the month, day, year, shift and production line on which the axles were assembled.

## ILLUSTRATION OF ENGINE TAG

Beginning with January 1964, Ford engines can also be identified by a tag attached directly to the engine.  
From this tag only the year and cu. in. displacement can be determined.

### 1974 - 1976

### 1977 - 1996

#### 4 CYL. ENGINES

4-81 - OHV used in front-wheel drive vehicles '88 & up.  
 4-98 - OHV used in front-wheel drive vehicles '81 to '85.  
 4-98 - OHV used in front-wheel drive vehicles '88 & up.  
 4-110 - DOHC used in front wheel drive vehicles '91 & up.  
 4-116 - OHV used in front-wheel drive vehicles '85 & up.  
 4-122 - DOHC.  
 4-133 - OHV used in front-wheel drive vehicles '89 to '92.  
 4-140 - OHV '74 & up; twin plug head started in '89.  
 4-140 - OHV used in front-wheel drive vehicles '84 & up.  
 4-153 - OHV used in front-wheel drive vehicles '86-91.

#### 6 CYL. ENGINES

6-144, 170, 230, 240 - Distributor is mounted on left side of engine.  
 6-153 - DOHC.  
 6-171 - German Ford 60 degree V6 with cast iron block & heads. Has mechanical lifters.  
 6-179 - German Ford 60 degree V6 with cast iron block & heads. Has hydraulic lifters and port injection.  
 6-183 - 60 degree V6 with cast iron block & heads. Has port injection.  
 6-183 - 60 degree V6 DOHC 24 valve.  
 6-196 - 60 degree V6 DOHC 24 valve.  
 6-223 - Distributor is mounted on right side of engine.  
 6-232 - 90 degree V6 aluminum cylinder heads.  
 6-245 - V6, Roller lifters & distributorless ignition '90 & up.

#### 8 CYL. ENGINES

8-221, 260, 289, 302 - Valve cover attached w/8 bolts; distributor in front; hydraulic lifters; water pump is mounted on front cover. Roller lifters added in some 302 '85 & up.  
 8-255 - Has long narrow runners on intake manifold.  
 8-280 - SOHC  
 8-280 - DOHC 32 valve.  
 8-302 Boss - Valve cover attached w/8 bolts. (Valve covers are wider than standard 8-302).  
 8-302 H.O. - forged pistons, low friction rings, roller lifters, higher compression '85 & up.  
 8-332, 352, 361, 410, 428 - Valve cover attached w/5 bolts; distributor at front; hydraulic lifters.  
 8-351W - Valve cover attached w/8 bolts; thermostat mounted in intake manifold.  
 8-351C, 8-351M, 8-400 - Valve cover attached w/8 bolts; thermostat mounted in block.  
 8-352 Special, 390 Special, 406, 427 - Valve cover attached w/5 bolts; distributor at front; mechanical lifters.  
 8-383, 430, 462 - Valve cover attached w/6 bolts; distributor at front; water pump mounts around front cover.  
 8-429, 460 - Valve cover attached w/7 bolts; distributor at front.

## GENERAL MOTORS CORPORATION

General Motors original equipment engines have identification information either stamped or labeled on them.

**Example: T0217UCH**

1PB157285

Of this identification information, the engine code designates which engine you have. The engine code can be two, three or four digits. In this example, **UCH** is the engine code. This was determined by decoding the identification information.

The first line decodes as follows:

T 02 17 **UCH**  
(1) (2) (3) (4)

**(1) SOURCE DESIGNATION**

F Flint Motor  
H Hydramatic  
K GM of Canada LTD  
M GM of Mexico  
S Saginaw  
T Tonawanda  
V Flint Engine

**(2) MONTH**

01 January  
02 February  
03 March  
04 April  
05 May  
06 June  
07 July  
08 August  
09 September  
10 October  
11 November  
12 December

**(3) DAY**

17 seventeenth day

**(4) ENGINE CODE (can be 2, 3 or 4 digits)**

**UCH** = 8-454 (7.4L) E.F.I. in a '93 Chevrolet or GMC Truck

The second line decodes as follows:

1 P B 157285  
(1) (2) (3) (4)

**(1) DIVISION**

1 Chevrolet  
2 Pontiac  
3 Oldsmobile  
4 Buick  
6 Cadillac

**(2) YEAR**

0 1960 or 1970  
1 1961 or 1971  
2 1962 or 1972  
3 1963 or 1973  
4 1964 or 1974  
5 1965 or 1975  
6 1966 or 1976  
7 1967 or 1977  
8 1968 or 1978

**(3) VEHICLE ASSEMBLY PLANT**

**(4) VEHICLE SEQUENTIAL NUMBER**

(last 6 digits of the VIN)

The identification information is occasionally stamped in different order. Sometimes only the first line is stamped.

**Examples:** (Engine codes are listed in bold.)

1PB157285  
**T0217UCH**

or

**T0217UCH**

Regardless of which order is used, all original equipment engines can be decoded using the information listed above. Chevrolet service replacement engines (warranty and over the counter) are stamped in this manner:

**Example: CE956479**

It decodes as follows:

**C E 9 56479**  
(1) (2) (3) (4)

(1) C = Chevrolet  
(2) E = Engine  
(3) Year

0	1970

- (4) 56479 = sequential built number assigned at the engine assembly factory

The identification information can be found on various locations on the engine. General Motors has changed and used many locations over the years. The following is a guide that covers most of the engine code locations.

#### 4 Cylinder:

##### (Chev)

- (1) On pad below the number one spark plug on the right side of cylinder block.
- (2) On left rear of cylinder block below exhaust manifold.
- (3) On pad on top of water pump housing.
- (4) On left rear bottom corner of cylinder block near oil pan.
- (5) On side of ramp at left rear of cylinder block.
- (6) On left front side of cylinder block below water pump.
- (7) On pad at right side of cylinder block above starter.

##### (Olds)

- (1) On left side of starter mount flange.

##### (Pont)

- (1) On side of ramp at left rear of cylinder block.
- (2) On left rear cylinder block just below cylinder head.
- (3) On center front of block next to timing cover.

#### 6 Cylinder:

##### (Buick)

- (1) On left front side of cylinder block next to timing cover.
- (2) On side of ramp at left rear of cylinder block.
- (3) On left side of starter mounting flange.
- (4) On left rear side of cylinder block.

##### (Chev)

- (1) On pad behind water pump.
- (2) On side of ramp at left rear of cylinder block.
- (3) On right front of cylinder block below cylinder head.
- (4) On right side of cylinder block.
- (5) On the cylinder block in front of the right cylinder head.
- (6) On left rear side of cylinder block next to oil filter base.
- (7) On right side of cylinder block behind the distributor.

##### (Olds)

- (1) On right front corner of cylinder block just below cylinder head.

#### 8 Cylinder:

##### (Buick)

- (1) On left side of cylinder block below the front two spark plugs.
- (2) On left side of cylinder block below the two rear spark plugs.

##### (Cad)

- (1) On plate at left rear corner side of cylinder block.
- (2) On rear upper portion of cylinder block behind intake manifold.

##### (Chev)

- (1) On the cylinder block in front of the right cylinder head.
- (2) On left rear side of cylinder block next to oil filter base.
- (3) On front or rear face of right valve cover.
- (4) On the water pump inlet.
- (5) On the thermostat cover.
- (6) On the right front side of the timing cover.
- (7) Starting in 1986, all small blocks will have the engine size (5.0L or 5.7L) cast on the left rear upper portion of block.

##### (Olds)

- (1) On oil filler tube.
- (2) On left side of cylinder block.
- (3) On front or rear sides of valve covers.
- (4) On side of ramp at left rear of cylinder block.
- (5) On left front side of cylinder block.
- (6) On left or right front cylinder block next to timing cover.
- (7) On left front and rear corners of cylinder block just below cylinder head.

##### (Pont)

- (1) On the front of the cylinder block below the right cylinder head.
